”

POLYSTONE MATERIAL

STONE RESIN (POLYSTONE)

Crafted of a selected blend of resins and advanced polymer, the exclusive polymeric composition of Le Celebrity Series collection bathwares bestow superior resistance to harsh chemicals and stains, offering ease of care and maintenance.

FINISH

Each Le Celebrity Series' bathwares is hand finished to either matte or gloss lustre.

QUALITY AND AESTHETICS

Our product are being manufactured with special detail to the material used in the production. We are therefore only work with eco-friendly, non-toxic materials that are safe for the clients.

HIGH QUALITY

Our products are very durable and almost immune to common dirt, bacteris or scratches. Should any scratches occur during products' life cycle, it cloud easily remove using water and polishing compound.

EASY MAINTENANCE

Regular cleaning with common non-abrasive cleaning agents will secure a long surface quality. Our material is resistant to deterioration and minor damages, mistake handling can be easily repaired.

NON- POROUS

Le Celebrity Series' solid surface is 100% non-porous and therefore unaffected by fluctuating moisture, ingression or humidity. This secure a long product's life and smooth appearance over years.

GUARANTEES

Le Celebrity Series is proud to offer a limited 5- years international warranty on all products.

MADE IN UNITED KINGDOM

In order to secure a long lasting color-proof finishing. Le Celebrity Series is importing the color pigments from the UK for a high quality result. We offer the following color options, of which are white, red black and yellow.

MATERIAL SURFACE TESTING

This is a SUPER WHITE MATTE nano material commonly used for Le Celebrity Bathware.

With the unpure material which commonly would cause the damage to the bathware, such as pencil, ink, lipsticks and etc.

Let's gets some vandalism spirit and be an artist.

Just clean the polluted surface with clear water.

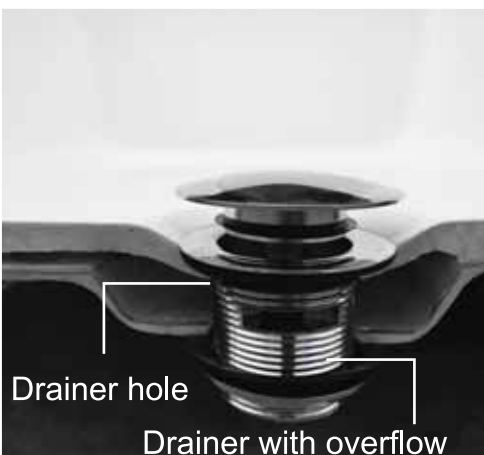

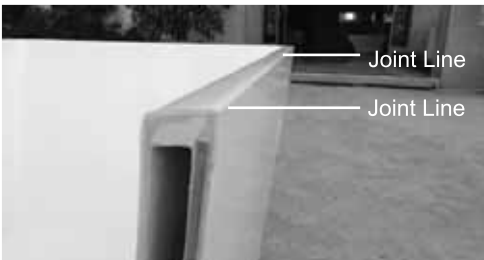

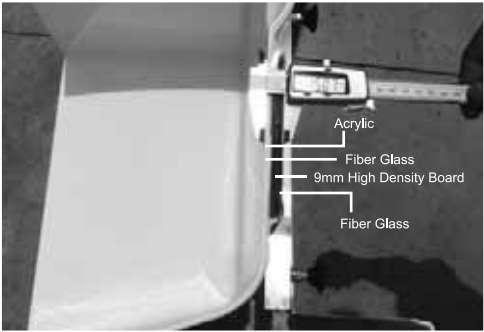

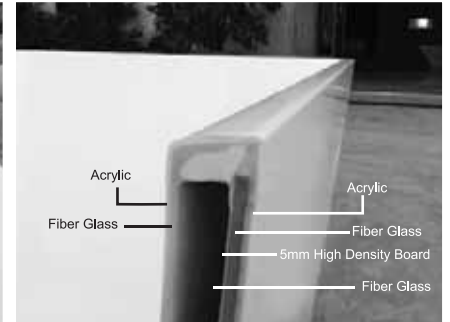

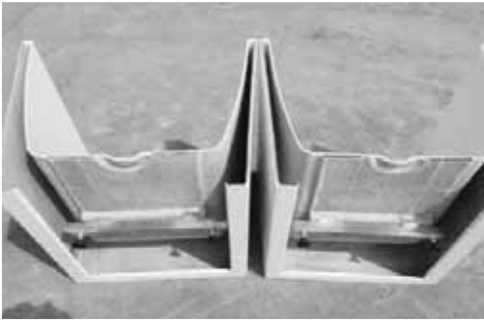

You will get back the surface you seen during you first encounter with the product.

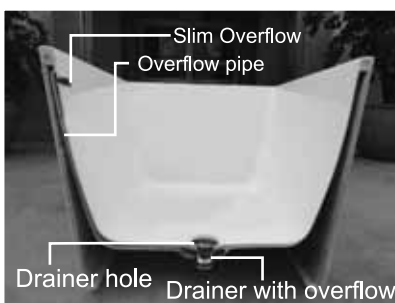

If the material turn old after years, simply rub them softly with any sand-paper to recover the original surface you long for.

ACRYLIC MATERIAL

TORA[®] DESIGN LIFE CONCEPT

Every piece of our product is kind of art work, kind of culture, and kind of life style. CARE & MAINTENANCE

Routine Care for Glossy Finish

Removing Stains and Fixing Scratches or Burns Like other high-use product, nicks, scratches and cuts are inevitable with Stone Resin. But because Stone Resin is solid all the way through, it is easy to renew to its original appearance as described below. Identify the extent of the damage and ascertain whether a minor repair will solve the problem. If the damage is minor, try to repair it with an abrasive cleanser or a common household degreaser. Soapy water or ammonia-based cleaners will remove most dirt and stains from both types of finishes. If the above step is unsuccessful, follow the simple polishing steps below:

Glossy Finish:

1. Clean the surface with water, making sure no dust remains.
2. Use 800 sandpaper to polish the surface in focus with water.
3. Use 1500 sandpaper to polish the surface with water to gain a smooth surface.
4. Use 2000 sandpaper to polish the surface with water to gain a smoother surface.
5. Wipe up the water with clean and dry cloth.
6. Polish with G3 wax.
7. Wipe up the remaining wax with a clean and dry cloth

Preventing Heat and Other Damage

Avoid exposing Stone Resin to strong chemicals, such as paint removers, oven cleaner, etc. If contact occurs, quickly flush the surface with water. Remove nail polish with a non-acetone-based polish remover and flush with water. Do not cut directly on Stone Resin countertops.

Renewing Stone Resin

While nicks, stains, cuts and scratches can permanently mar most other surfaces, they won't compromise the appearance of Stone Resin solid surfaces. That's because it's easy to restore Stone Resin to its original state, using an ordinary abrasive cleanser and common household degreaser. If damage does occur, Stone Resin can be repaired on site, saving both downtime and aggravation.

Routine Care for MATTE Finish

Removing Stains and Fixing Scratches or Burns Like other high-use product, nicks, scratches and cuts are inevitable with Stone Resin. But because Stone Resin is solid all the way through, it is easy to renew to its original appearance as described below. Identify the extent of the damage and ascertain whether a minor repair will solve the problem. If the damage is minor, try to repair it with an abrasive cleanser or a common household degreaser. Soapy water or ammonia-based cleaners will remove most dirt and stains from both types of finishes. If the above step is unsuccessful, follow the simple polishing steps below:

Matte Finish:

1. Clean the surface with water, making sure no dust remains.
2. Use 800 sandpaper to polish the surface in focus with water to gain a smooth surface and matte finish.
3. Wipe up the water with clean and dry cloth.

Preventing Heat and Other Damage

Avoid exposing Stone Resin to strong chemicals, such as paint removers, oven cleaner, etc. If contact occurs, quickly flush the surface with water. Do not cut directly on Stone Resin countertops.

Renewing Stone Resin While nicks, stains, cuts and scratches can permanently mar most other surfaces, they won't compromise the appearance of Stone Resin solid surfaces. That's because it's easy to restore Stone Resin to its original state, using an ordinary abrasive cleanser and common household degreaser. If damage does occur, Stone Resin can be repaired on site, saving both downtime and aggravation.
